Business Scenario, Users, & Weekly Decisions

Business: We are a data-driven social marketing agency that partners with digital content creators to grow their audience engagement, monetization performance, and long-term brand value across platforms.

Our competitive advantage is using analytics and strategic content planning to increase influencer revenue while sustaining audience growth.

Primary Dashboard User: Content Creators

The dashboard is designed to help our content creators make weekly strategic decisions about their content, monetization balance, and audience growth.

Key Weekly Decisions:

Content Optimization Decision:

What content should I make more of next week based on what people saved, shared, and came back to watch?

Monetization Balance Decision:

Should I increase, maintain, or reduce sponsored content based on its impact on engagement, audience growth, and diversification?

Conversion & Call-to-Action Decision:

Which posts should receive stronger calls-to-action or link placement to improve click-through and revenue performance?

Strategic Theme:

Scale influencer/creator revenue while sustaining long-term audience growth.

Balanced Scorecard Objectives			
Financial	Customer	Internal Process	Learning & Growing
Increase average monthly revenue.	Increase immediate relevance and high-value engagement.	Optimize posting cadence to support engagement and retention.	Learn advanced data analytics and platform expertise.
Diversify revenue streams.	Increase repeat viewership and active audience participation.	Reduce production time without sacrificing quality.	Solidify the tools to track performance and content.
Improve profitability.	Sustain follower growth during monetized content.	Improve content planning.	Strengthen brand partnership and negotiation capabilities.

KPI Set + KPI Dictionary							
Perspective	KPI Name	Linked Objective & BSC	Type	Formula & Units	Data Source & Owner	Cadence & Target	Actionability (Next Steps)
Financial	Revenue Per 1,000 Views (RPM)	Increase monthly revenue	Lagging	Creators control views and monetization mix. USD per 1,000 views	Data Source: Platform monetization reports + sponsorship tracker Owner: Content Creator	Weekly Target: Maintain or grow RPM week over week	If RPM drops, evaluate monetization mix, sponsorship pricing, or CTA effectiveness.
Financial	Revenue Mix by Stream (%)	Diversify revenue streams	Lagging	Revenue from stream (ads, affiliates, subs, merch)/Total revenue x 100,	Platform reports, storefront analytics, and monetization dashboards for relevant platforms Owner: Content Creator	Monthly Target: No single revenue stream > 70% of total revenue	If one stream dominates (e.g., ads > 70%), launch or promote secondary streams of revenue.
Financial	Conversion Rate on Monetized Posts	Improve profitability.	Lagging	Clicks or Conversions + Post Impressions x 100	Owner: Content Creator	Weekly Target: Benchmark against the last 4-week average	If conversion drops, strengthen CTA placement, pinned comments, or link positioning.
Customer	High Value Engagement Rate	Increase immediate relevance and high-value engagement.	Leading	(Saves + Shares + Meaningful Comments) / Impressions * 100 (%)	Source: Platform Insights. Owner: Content Creator	Weekly. Target: 5% - 8%	If low: Review hooks/CTA (Call-to-action) and explicitly prompt for shares.

Customer	Repeat Viewer Rate	Increase repeat viewership and active audience participation.	Leading	(Returning Viewers / Total Unique Viewers) * 100 (%)	Source: YouTube / TikTok Analytics. Owner: Content Creator	Weekly. Target: > = 40%	If low: Strengthen hooks; test episodic/recurring series.
Customer	Sponsored vs Organic Growth	Sustain follower growth during monetized content.	Lagging	Sponsored Growth Rate - Organic Growth Rate (Diff %)	Source: Follower Reports. Owner: Content Creator	Weekly. Target: Difference < = 1%	If > 1% drop: Adjust brand fit or tone for next campaign.
Internal Process	Posting Adherence Rate (%)	Improve consistency	Leading	(Posts Published / Posts Planned) * 100 (%)	Source: Notion / Calendar. Owner: Content Creator	Weekly. Target: > = 90%	If low: Simplify schedule or batch-produce content.
Internal Process	Avg Production Time	Reduce production time	Leading	Total production time / # pieces produced (Hours/Piece)	Source: Manual Log. Owner: Content Creator/Editor	Weekly. Target: Short < = 1.5h / Long < = 6h	If high: Streamline editing workflow/ hire additional editors or use templates.
Internal Process	% Planned vs. Last-Minute	Improve the idea pipeline	Leading	(Planned Posts / Total Published) * 100 (%)	Source: Content Calendar. Owner: Content Creator	Weekly. Target: > = 80%	If low: Block time for ideation and increase backlog.
Learning & Growth	Advanced Analytics Training	Platform expertise	Leading	(Completed Modules / Assigned Modules) * 100 (%)	Source: Relevant Owner: Content Creator	Daily. Target: 100% (85% score)	If low: Assign the creator to the advanced analytics workshops.
Learning & Growth	Employee Skills (Deal Value)	Negotiation & CRM skills	Leading	(Avg Deal Q2 - Avg Deal Q1) / Avg Deal Q1 * 100 (%)	Source: CRM / Contracts. Owner: Content Manager	Quarterly. Target: +10% to 15%	If flat: Conduct deal debriefs and negotiation training.
Learning & Growth	Campaign System Usage	Improve tool tracking	Leading	(Documented Campaigns / Total Launched) * 100 (%)	Source: Campaign Dashboard. Owner: Content Manager	Monthly. Target: > = 95%	If low: Require CRM documentation before approving campaigns.

Financial Performance Summary					
Metric	Current Period (\$)	Previous Period (\$)	Growth (%)	Target (\$)	
Ad Revenue	18420	12850	43.3	20000	
Affiliate Revenue	9850	6400	53.9	11000	
Direct Support	3720	2100	77.1	5000	
Instagram Revenue	8200	4900	67.3	10000	
Merchandise Sales	2140	550	289.1	3000	
Sponsorship Revenue	14680	10200	43.9	16000	
TikTok Revenue	15300	11800	29.7	18000	
Total Revenue	48700	32100	51.7	55000	
Twitch Revenue	2700	1200	125	2000	
YouTube Revenue	22500	14200	58.5	25000	

Managerial Interpretation

If we reviewed this dashboard on Monday morning, we would use it to make three primary decisions: content focus, monetization balance, and conversion optimization.

First, we would review High Value Engagement Rate and Repeat Viewer Rate to identify which content types generated the strongest saves, shares, and returning viewers. Based on this, we would select two to three themes or formats to prioritize in the upcoming week's content calendar.

Second, we would compare Sponsored vs Organic Growth and Revenue Per 1,000 Views (RPM) to determine whether sponsored content is supporting or weakening audience growth. If sponsored posts maintained growth within the target range, we would continue or expand similar partnerships. If growth declined, we would adjust brand fit, integration style, or reduce sponsored volume for the upcoming week.

Third, we would analyze Conversion Rate on Monetized Posts to decide which posts should receive stronger calls-to-action, link placement, or pinned comments to improve monetization performance.

This dashboard enables proactive adjustments before revenue or follower loss becomes a long-term issue.

Three Likely Actions Based on KPI Changes

1. **If the Repeat Viewer Rate drops below the target:**
We investigate the audience retention curve to identify where viewers are dropping off. We then test stronger opening hooks or introduce recurring episodic content the following week.
2. **If Sponsored vs Organic Growth shows a decline greater than 1 percent:**
We analyze engagement and comment sentiment on sponsored posts to evaluate brand alignment. We adjust sponsorship tone, format, or category before launching the next campaign.
3. **If the High Value Engagement Rate declines while Posting Adherence remains high:**
We investigate content quality rather than consistency. We revise content structure, strengthen value delivery, and explicitly prompt saves and shares in the next week's posts.

Digital Risks

Vanity Metric Manipulation Risk

An excessive focus on likes, views, or follower counts may encourage artificial growth tactics such as engagement pods, purchased followers, or clickbait content. This can distort performance insights and damage long-term brand credibility.

Unintended Incentives Risk

If performance targets focus primarily on short-term revenue or follower growth, creators may prioritize poorly aligned sponsorships that harm audience trust and long-term brand equity.

Digital Responsibility

Clear KPI Definitions & Governance Standards

Establish standardized KPI definitions (e.g., meaningful engagement vs. vanity engagement) and document calculation methods to prevent metric manipulation or misinterpretation.

Data Access Controls & Audits

Limit CRM and analytics access to authorized users only.
Implement secure login requirements and periodic reviews of data accuracy and sponsorship reporting.

Team Roles + Contribution				
Frankie	Deshan	Tyler	Jorge	Jesús
Led group coordination and communication throughout the project Co-developed the Balanced Scorecard structure to ensure a connected strategy story across all four perspectives Developed Customer Objectives and KPIs 2 and 3 Refined language across sections to maintain coherence and a clear strategic throughline	Structured and formatted the KPI Set and KPI Dictionary for clarity and consistency Developed Internal Process objectives and associated KPIs Designed and created the 1-page dashboard wireframe layout Structured visual hierarchy including headline KPIs, trend views, and target comparisons	Developed Financial objectives and KPIs Contributed formulas, targets, and definitions within the KPI Dictionary Drafted the AI Use Statement Supported alignment between financial metrics and the strategic theme	Developed Learning and Growth objectives and KPIs Drafted the Digital Risk and Responsibility section Identified risks related to metric manipulation and unintended incentives Proposed governance standards and mitigation strategies	Developed Customer Objective and KPI 1 Drafted the Managerial Interpretation section Connected KPI movements to specific weekly decision actions
Group Collaborative Contributions				
Developed the Business Scenario, Primary User, and Weekly Decision framework Defined the Strategic Theme to guide Balanced Scorecard alignment Reviewed and refined the final document for clarity and consistency				

AI Use Statement

Generative AI tools, including ChatGPT and Claude, were used during group collaboration for brainstorming, refining wording, and structuring KPI definitions. Representative prompts included requests to clarify Balanced Scorecard alignment, improve KPI formulas, and refine managerial interpretation language.

All final written content, KPI selections, formulas, and strategic decisions were developed, reviewed, and approved by the group members. AI was used as a support tool for ideation and clarity, not as a substitute for original analysis or authorship.
